Project Summary

This project demonstrates end-to-end accounting operations and financial reporting using Xero for a small service-based business. The work focused on maintaining clean accounting records, performing bank reconciliations, monitoring receivables and payables, and generating accurate month-end financial statements to support cash-flow visibility and management decision-making.

Problem

The business required a clean catch-up and reporting process to confirm cash accuracy, monitor outstanding receivables and payables, and assess financial performance for the period.

Approach

Reconciled bank accounts, reviewed AR/AP aging reports, and prepared core financial statements in Xero to support accurate period-end reporting and cash visibility.

Deliverables

All reports were generated directly from Xero using a live accounting environment.
